US exporters report soymeal sales to Spain

AI editorial illustration · NALAM AGRO

Export sales | 20 November

Private exporters reported the bookings to USDA for delivery to Spain in 2026/27. The announcement gives no price, protein specification, discharge port or shipment month.

NALAM trade desk observation

The sale puts a number on Spanish demand for US feed ingredients. To assess competition with sunflower or rapeseed meal at a particular mill, a buyer still needs the delivered cost per tonne, the protein specification and the arrival window. The booking alone says little about nearby availability.

Missouri cash bids | 20 November

In Kansas City, St. Louis and St. Joseph, soybean bids rose 8–14 US cents per bushel on Friday but ended the week 8–26 cents lower. Weekly declines were 6–16 cents for corn and 17–19 cents for wheat. These are changes in local buying indications.

Northwest European sunflower oil

Fastmarkets Sunoil FOB Six Ports (AG-SSD-0003, USD/mt): No fresh verified quote. The public assessment page is provided for reference.
